Vince,

STAT

STAT

I checked with [] TSD []
In the past 3 years TSD recalled and screened the deposits at the Records Center and sent the residue to CI. Apparently the 20 boxes in this memo are the ones they got from TSD. As the review dates come up TSD will be recalling and reviewing the material from their deposits. After screening the remainder will go to CI. Was thought there would be about 80 feet to be screened over the next 5 years before being transferred to CI.

With this in mind I feel that CI should amend its schedule before we accept the item in the Records Center. If you approve this request what's to prevent them from "forgetting" to provide for the retirement on the schedule.

STAT

Unless [] has room and wants to do them the favor, I would suggest something like this:

"Due to limited space in the Records Center, we are unable to accept records for transfer to the Center unless the item is properly scheduled and approved for transfer."

"When the item covering these records is submitted to us for approval we shall be glad to give further consideration to your request."
